[2017\(January\)EPR-SR.directory\\_SITEassign.pdf](#)

Christine:

Attached is a current directory and site assignments list for the Superfund Remedial Program (January 2017). It identifies which Remedial Project Manager is assigned to each Superfund site or portion thereof in Region 8. Louise Jensen maintains the updated list if there are any questions about whom to contact for a particular site. As you can see from the list, Nikia Greene is the RPM currently assigned to the Montana Pole site. The data in SEMS are current, too, although SEMS does not identify RPMs that may only be responsible for individual operable units at a given site.

Please let me know if you have any questions or if you require additional information.

Thank you,

Joe

Thanks! Much appreciated!

I'll wait back to hear from Joe.

Stay well,

**Importance:** High

Christine,

It's always nice to hear from you but I am no longer in Superfund. I'm including Joe on this message so he can put you in touch with the correct RPM.

**Importance:** High

Hi Diana,

Not sure if you heard, but I'm the new EPR-Support Data Coordinator for the site(s) below. During the past few months, our group has been working on streamlining procedures related to Remedial and Site Assessment data management. We are also seeking to improve our outreach efforts, including how we can best assist our R8 RPMs/SAMs before, during and after each field season.

I also wanted you to know that one of my primary tasks will be conducting regular reviews of missing or invalid data in the Scribe database to ensure compliance with our R8 Data Management Plan. Once I've reviewed each site's data, I'll be contacting the RPM/SAM with a status report and next steps.

Before I get started on the review, could you verify the information below by the end of the week to ensure our team has all the pertinent information related to this site?

If there are any errors in the table, first reply to this email, then correct the table.

Any questions, please email or call x6992.

Much appreciated and looking forward to working with you and your data!
